Dust Control for Fibers, Composites and Plastics
Dust Control to Improve Composite Manufacturing and Integration

Dust control during manufacturing, cutting, trimming, sanding and grinding of composite materials is critical to modern operations.

- Improve product quality
- Reduce contaminated parts resulting in scrap
- Maintain compliance with industry regulations
- Lower equipment maintenance costs
- Increase worker productivity and health

Solutions for Your Unique Applications

Nilfisk industrial vacuums are reliable, simple to operate, and require virtually no maintenance. They guarantee a thorough cleaning and collection so you get the job done right the first time.

- Explosion-proof or hazardous location vacuums that are suitable for paint hangers, and other locations with combustible dust
- Vacuum-assisted power tools including sanders and grinders that capture hazardous dust at the source
- Control respirable dust with contaminant-free exhaust with HEPA/ULPA filtration that captures even the finest dust down to 0.3 microns
- Portable central vacuum systems to move easily throughout your facility
- Collect dispersed dust in CNC machines to maintain line of sight through milling processes
- Hard-wire vacuum systems to run when other equipment runs
- Safe collection & disposal of foreign object debris (FOD)

Expert Support

We support you with a highly-trained direct sales team. Dedicated to solving your individual challenges, our team analyzes your processes and recommends the best vacuums and features for your particular application.
